# ENVIRONMENTAL RISK ASSESSMENT FORM

READ THE ADVISORY NOTES PROVIDED BEFORE YOU CARRY OUT AN ASSESSEMENT

<b>Before the ERA</b>	Name of Site and Address:		
	Name of Client and/or Client's site representative:		
	Contract no:		
	Name of Assessor:		
	Date of Assessment:		
<b>The Infestation</b>	Carry out a site survey and provide the document reference.	Document ref: .....	
	Were environmental risks noted during the survey? Complete an ERA and the remainder of this form is the answer is yes.	Yes / No	
	Is there a current rodent infestation?	Rat: Yes / No	Mouse: Yes / No
	Is the rodent infestation situated only indoors and will baits only be placed indoors?	Yes / No	
	Is there a significant risk to human health or animal health presented by a possible future infestation?	Yes / No	
	Do you intend to use permanent baiting?	Yes / No	
	If 'yes' give the reference to the document showing justification:	Document ref: .....	
<b>Risk Hierarchy</b>	Why is it necessary to use a rodenticide at this site? Why can't the situation be resolved by other methods, such as improving hygiene and preventing rodent ingress to sensitive areas or traps?		
	Explain your choice of rodenticide use based on the risks identified on this site.		

<b>Sensitive areas</b>	Record if the site is entirely, or contains a part of, one of the designated sensitive areas listed in the advisory leaflet. If so, list any protected species that may be present.	
<b>Products</b>	Give product name, active ingredient and HSE Authorisation Numbers† for all products to be used.	
<b>The ERA*</b>	Provide a list of all environmental risks you perceive to be present at the site:	
	Provide a list of all the measures you will use during rodenticide application at the site to reduce the risks you have identified:	
<b>Disposal of rodent carcasses</b>	How often will you search for rodent carcasses?	
	Will others on site also search for rodent carcasses?	Yes / No
	What measures will you use safely to dispose of rodent carcasses?	
<b>Disposal of spent bait</b>	How will you dispose of spent bait?	
<b>Conclusion</b>	With due consideration to the information recorded above, can this treatment safely proceed without unacceptable damage to wildlife and the environment?	Yes / No

\* if there is insufficient room in the boxes provided use additional sheets and secure them to this sheet.
